RIFKI SETIAWAN

Full-Stack Developer

+62 851-7695-7755 | rifki.setiawan0101@gmail.com | Portfolio | LinkedIn | GitHub

South Bekasi, Bekasi City

Digital Multimedia Engineering student who specializes in full-stack website development. Experienced in project development cycle from idea to deployment, proven by successfully developing and deploying 3 websites. Skilled in building frontend websites with JavaScript frameworks, designing backend architecture, managing relational and NoSQL databases, and applying modern development principles to create scalable and efficient applications.

PENDIDIKAN

Jakarta State Polytechnic | Depok   *September 2023 - Present*

D4 Digital Multimedia Engineering - IP 3,94 (5th Semester)

Relevant Coursework: Web Programming, Web Design, Object Based Programming

SERTIFICATION

- Learn Basic JavaScript Programming - Dicoding   *July 2025*

PROYEK PRIBADI

Fullstack Developer | Personal Projects   *September 2024 – Present*

- **Situation:** Developing some personal projects to deepen the understanding of modern web architecture and full-stack development cycle.
- **Technical Action**:
  - Manage relational (PostgreSQL, MySQL) and NoSQL (MongoDB) databases from schema to CRUD.
  - Design MongoDB database schema with Mongoose and PostgreSQL with Prisma ORM.
  - Build dynamic UI using React.js, Next. js (App Router), CSS animation, and Tailwind CSS.
  - Built backend API using Next.js API Routes and RESTful API Node.js & Express.js.
  - Integrated services such as Supabase for database and storage and Resend API for email.
- **Result**:
  - Successfully built (4) and deployed (3) web applications, including a functional CMS (Content Management System) built from scratch.
  - Successfully deployed applications with different architectures: Separate Architecture (Frontend on Vercel, Backend on Railway) and Unified Architecture (Full-stack Next.js on Vercel).

My Web PortFolio | Link Proyek

A full-stack application designed to showcase frontend and backend development skills. Featuring a modern user interface and a custom backend API for handling contact forms.

EXPERTISE (HARD SKILLS)

Fullstack Developer

- **Frontend**: HTML5, CSS3, JavaScript, React.js, Tailwind CSS, Bootstrap
- **Backend**: Next.js API Routes, Node.js, Express.js, PHP
- **Database**: PostgreSQL, MongoDB, MySQL
- **Cloud & Platform**: Supabase (Database & Storage), Vercel, Railway, Resend API

Programming Language

JavaScript (ES6+), TypeScript, PHP, C#, C++, Java, Python

Tools & Other Platforms

GitHub, VS Code, Visual Studio, Notion, Trello, Jira, Plane.so, Figma, Adobe Photoshop, Wordpress

VOLUNTEER & COMMITTEE EXPERIENCE

Module Writer (Volunteer) | Disnaker Depok   *July 2025*

Created 2 learning modules titled "Website Creation Tutorial Using Wordpress" and "Creating Short Videos Using Canva".

Administration Staff | Event TIK Games 2024   *May 2024 - August 2024*

Manage administrative documents in the form of proposals, letters, discussion results, and division of tasks to ensure smooth communication with 8+ external parties and coordination of 53 committee members.

SOFT SKILLS

- Problem Solving, Detail Oriented, Fast Learner, Teamwork, Adaptability
- Bahasa Indonesia: Native
- English: Proficient in Technical Reading & Writing
